

La division permet de partager

$$15:3=5$$

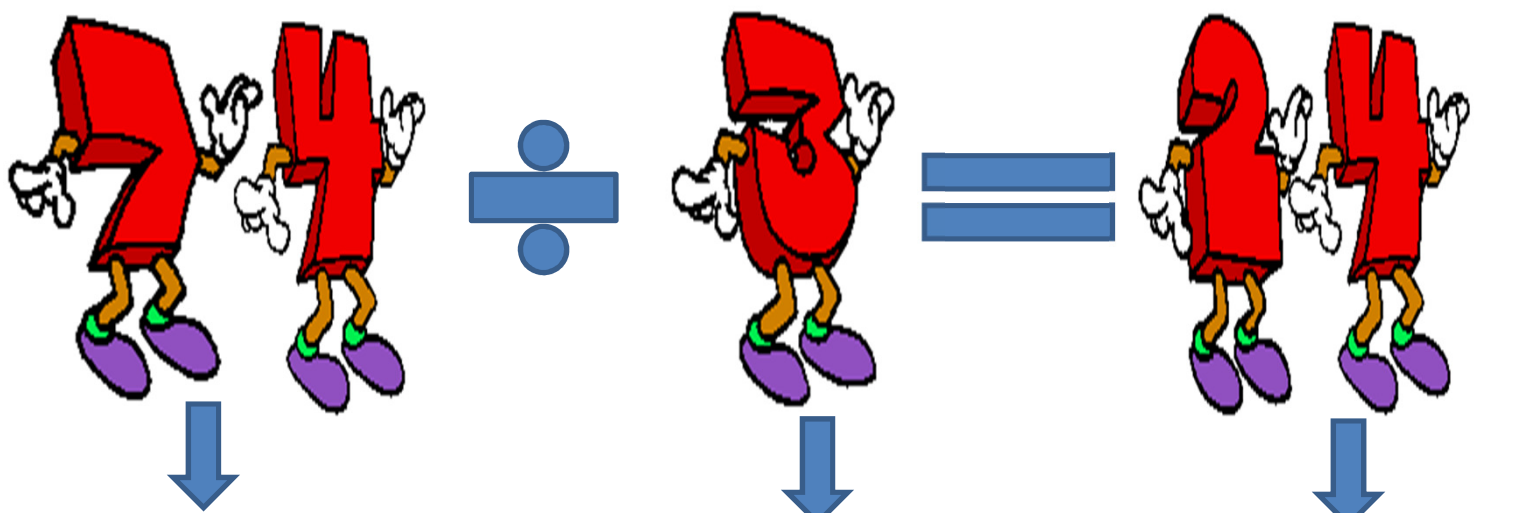

La division permet de répartir des quantités identiques

Il faut répartir 43 œufs dans des boîtes de 6

$$43:6=7 \text{ boîtes reste } 1 \text{ œuf}$$

Vocabulaire pour la division

A division equation is illustrated using cartoon numbers. On the left, the numbers 7 and 4 are joined to form the dividend 74. In the middle, the number 3 represents the divisor. On the right, the numbers 2 and 4 are joined to form the quotient 24. The equation is written as 74 ÷ 3 = 24. Blue arrows point from each of these three groups of numbers down to their respective labels.
